HIGH PERFORMANCE LIGHTING

TRIPLE-R 8 ('1000') ELITE2

Utilising high intensity LEDs, coupled with sophisticated component technology, the Triple-R 8 (or '1000') Elite2 emits an incredible amount of light - 9,020 lumen which allows the lamp to achieve 1 lux at an impressive 721m. Compared to the equivalent 'Standard' product the Elite2 delivers more distance illumination, with a distribution of light that has been carefully optimised to still give good spread of light in the mid-long range. E-mark approval thanks to 'E-Boost' technology ensures this product always exceeds expectations whether at the track, or on public roads.
