HIGH PERFORMANCE LIGHTING

# RS4

A world first when introduced and still setting the standard, the RS-4 features three ECE approved functions in one compact unit. During daytime driving, the 10 x 0.5W LEDs illuminate to become daytime running lights (DRL). When the vehicle side lights are switched on, these LEDs run at reduced intensity, while switching on the vehicle High Beam, activates the 4 x 11W LEDs, to deliver huge illumination on the road. Our Dual-Optic reflector system combine with advanced thermal management systems for optimising light output under all conditions.
